

'In Common': Reflections from the LFA2023 Curation Panel

Hadi Yassine, Kingston University, (Transcript)

Hadi: The theme of 'In Common' means to me, that we should have a sense of community and we should have local people in the initiative.

It would be great to see a lot of community aspect into it and a lot of community driven projects, especially people in the local area. As well as the younger age of people like me coming together and being interested in architecture because a quite a lot of people at my age aren't really into architecture, like, generally. So I think it would be great to see lot of younger teens and young adults interested in architecture.
